PEOPLE DON'T BUY
WHAT YOU DO, THEY
BUY WHY YOU DO IT.

Let's grow your business, together.

Your Business

Oplus Pharmacies

#دائمًا_بجانبك

O Plus Pharmacies is a household name in Saudi arabia healthcare, backed by 20+ years of trust and a powerful network of 60+ branches across Riyadh, Al-Kharj, Al-Dilam, Al-Hawtah, and Wadi ad-Dawasir.

Our research shows that your established market authority is the perfect launchpad to dominate the e-commerce and digital landscape next.

Your Needs

To support your next phase of growth, O Plus is focusing on creating a seamless omnichannel experience. Based on our discussions, your needs include:

UI/UX (Web & App): Designing modern, user-friendly storefront and mobile app interfaces that reflect your established brand identity, making navigation and checkout effortless.

SEO-First Design Structure: Ensuring the new web and app layouts are technically structured from day one to align with search engine guidelines, driving maximum organic visibility.

Missing Pieces

There are critical gaps preventing your e-commerce store from reaching its full revenue potential:

SEO Infrastructure Gap: Your store is currently missing out on high-intent, transactional keywords on Google, allowing competitors to capture ready-to-buy customers.

Technical & On-Page: Minor technical SEO issues and unoptimized product descriptions that hurt both Google rankings and the final checkout experience.

Our approach

Design and marketing do not happen in isolation; strategy drives every decision we make.

Phase 1: Audit & Discovery: We deep-dive into your store's technical health, keyword opportunities, and audit your competitors' social media strategies.

Phase 2: Strategy & Optimization: We develop user-centered wireframes and visual designs for both your e-commerce store and mobile app.

Phase 3: Scale & Amplify: We continuously analyze performance data, optimize product pages for conversions, and refine content to maximize reach and engagement.

Proposed Services

E-commerce SEO Optimization & UI Design

Comprehensive Technical Audit: Fixing site speed, broken links, and mobile responsiveness.

Advanced Keyword Research: Targeting high-buying-intent search terms.

On-Page & Product Page Optimization: Optimizing Meta tags, URL structures, and writing SEO-friendly product descriptions.

Store & Mobile App UI Design: Crafting high-converting, modern interfaces and seamless user flows for both your web store and mobile application.

Pricing & Packages

1. SEO & UI Design Package	Description	Price & Duration
